

BRIAN OGERO

Software Developer | AI Enthusiast

Nakuru, Kenya • +254 759 776 864 • brianogero@kabarak.ac.ke • ogero.dev • github.com/Ogero79

PROFESSIONAL SUMMARY

Results-driven software developer and emerging data professional with a strong foundation in computer security, full-stack web development, and systems administration. Holds an Oracle AI Foundations certification, demonstrating validated knowledge in artificial intelligence and machine learning concepts. Proven ability to design, deploy, and optimize data-driven applications using Python, JavaScript, and modern web frameworks. Experienced in working within government ICT environments and applying analytical thinking to solve complex technical challenges. Passionate about leveraging data analytics and artificial intelligence to support evidence-based decision-making and drive humanitarian impact; values closely aligned with the United Nations' mission of innovation in service of global development.

EDUCATION

B.Sc. Computer Security & Forensics

September 2022 – December 2026 (Expected)

Kabarak University, Nakuru, Kenya | Full-Time, On-Campus

Relevant Coursework: Network Security, Database Management Systems, Systems Analysis & Design, Operating Systems, Computer Forensics, Data Structures & Algorithms

CERTIFICATIONS

Oracle AI Foundations Certified Associate

Oracle Corporation

Covers core AI/ML concepts including machine learning fundamentals, natural language processing, computer vision, and responsible AI principles.

CORE TECHNICAL COMPETENCIES

Programming Languages: Python, JavaScript, SQL

Data & Analytics: Data analysis with Python (Pandas, NumPy), REST API integration, PostgreSQL querying & optimization

AI & Machine Learning: Oracle AI Foundations certified; Python-based AI integrations, automation scripting, API-driven ML workflows

Frontend Development: React, Next.js

Backend Development: Node.js, FastAPI, RESTful API design & consumption

Infrastructure & Tools: Git, Docker, Linux (Ubuntu), network configuration

Soft Skills: Analytical thinking, cross-functional collaboration, technical problem-solving, written and verbal communication

PROFESSIONAL EXPERIENCE

IT Attachment Intern | Kisumu County Government

August 2025 – December 2025

Supervisor: Ronald Mukele (Information Technology Officer) | Reason for leaving: Internship period completed

- Supported the management and maintenance of mission-critical internal software systems serving over 500 county staff, ensuring minimal downtime and consistent service delivery.
- Diagnosed and resolved complex network connectivity and configuration issues, improving departmental network reliability and reducing incident response times.
- Assisted in planning and executing software deployments and system upgrades, contributing to a more secure and up-to-date IT environment.
- Collaborated with the IT team to document technical processes and procedures, supporting institutional knowledge management.
- Gained hands-on exposure to government data infrastructure, data governance practices, and public sector ICT protocols.

Freelance Software Developer | Self-Employed

January 2024 – Present

Nakuru, Kenya | ogero.dev

- Designed and developed full-stack web applications for clients using React, Next.js, Node.js, and PostgreSQL, translating business requirements into scalable, production-ready solutions.
- Engineered Python automation scripts to streamline repetitive data-processing workflows, reducing manual effort by significant margins for clients.
- Integrated third-party REST APIs and data sources to build data-rich dashboards and reporting interfaces.
- Delivered pixel-perfect UI implementations from Figma design mockups, ensuring responsive, cross-browser compatibility.
- Managed end-to-end project delivery independently; from requirements gathering and system design to deployment and client handover.

NOTABLE PROJECTS

Portfolio of web applications, dashboards, and automation tools available at ogero.dev and github.com/Ogero79:

- Data-driven web dashboards with real-time API integrations, demonstrating ability to surface insights from raw data sources.
- Full-stack applications with PostgreSQL backends, showcasing database design, query optimization, and RESTful architecture.
- Python automation tools for data extraction, transformation, and reporting; directly applicable to analytics workflows.
- Responsive, mobile-first frontend interfaces built with React and Next.js.

LEADERSHIP & COMMUNITY ENGAGEMENT

- Microsoft Learn Student Ambassador (MLSA)
- Google Developer Student Clubs (GDSC) Member - Kabarak University
- Climb4Dreams Fellowship - mentorship and youth empowerment initiative
- Inspire Spaces Community - collaborative learning and professional development community
